Activity Centre

Term I 2027 Programs

Brain Challenges and Puzzles (K-6)

This program is perfect for students who enjoy solving problems, playing games and thinking creatively.

Students in K - Year 2 will enjoy board games, maths games, word puzzles and jigsaw puzzles, as well as hands-on challenges designed to build confidence and thinking skills.

Students in Years 3-6 will explore secret codes and ciphers, solve puzzles, crack clues and work through a range of fun maths and logic challenges. They will develop their problem-solving skills while working independently and with others.

This is a fun and engaging activity for students who enjoy a challenge and love to think outside the box.

Coding and LEGO Robotics (3-6)

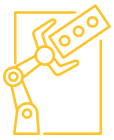

The activity gives students the opportunity to design, build and program their own robotic creations. Through hands on challenges, students will develop coding, problem-solving, engineering, creativity and teamwork skills.

Sport Skills and Movement (K-6)

The sports program gives students from K - Year 6 the opportunity to develop their skills through drills, games and friendly challenges.

Two dedicated programs for K - Year 2 and Years 3-6 will see students exploring the game of soccer and ultimate Frisbee across Term I.

Build it! LEGO (K-2)

Build it! LEGO gives K - Year 2 students the opportunity to use their imagination through fun hands-on building challenges.

Students will develop creativity, problem-solving, planning and teamwork skills as they design, build and share their LEGO creations.

Checkmates! (K-6)

Checkmates is for students from K - Year 6, with two dedicated programs for K - Year 2 and Years 3-6, catering for beginners through to experienced chess players.

Through lessons, games and friendly challenges, students will develop strategic thinking, concentration and problem-solving skills whilst learning the skills of the classic game of chess!

Art Club (K-6)

Art Club provides students from K - Year 6, with two dedicated programs for K - Year 2 and Years 3-6, the opportunity to explore drawing, painting, sculpture, clay and mixed media. Through fun, hands-on projects, students will develop creativity, confidence and artistic skills in a supportive environment.
